- ✓ IAPMO R&T certified
- ✓ Provides reliable protection for water using appliances
- ✓ 1" bypass hard water valve
- ✓ Lifetime Warranty on distributor head, valve & tank

**CLEAN, HEALTHY WATER
FOR YOUR FAMILY AND HOME**

Activated carbon filters use adsorption to treat residential water. These filters protect the home by removing or significantly reducing chlorine, chloramines, volatile organic compounds (VOCs), H2S, as well as many other dangerous contaminants.

WHY REMOVE CHLORINE?

- Once disinfected water from the public utility arrives safely to the home, there is no further need for disinfectants.
- Chlorine causes odor & bad taste.
- Chlorine causes dry, damaged hair.
- Chlorine damages plumbing & fixtures.
- Chlorine destroys water softener resin.
- Chlorine causes harmful by-products such as total trihalomethanes, a well known carcinogen that causes bladder cancer.

SPECIFICATIONS	PCC10	PCC15	PCC20	PCC30
Peak Flow Rate	7.0 GPM	10.0 GPM	14.0 GPM	21.0 GPM
Filter Media Volume (Cubic Feet)	1.0ft ³	1.5ft ³	2ft ³	3ft ³
Filter Tank Size	9x48	10x54	12x52	14x65
Plumbing Connections	3/4" through 1.5"			
Electrical Requirments	None			
Water Pressure	Max 125 PSI
