**BETTER THAN BOTTLED WATER
STRAIGHT FROM YOUR TAP**

SHOK BLOK™

A system protection valve designed to protect your water system from water hammer and spikes in water pressure.

FLOWLOK™

A unique device that works through a specially fabric disc that expands upon contact with water. If the Flowlok disc detects water, it expands and pushes the shut off lever to turn the water off to the system.

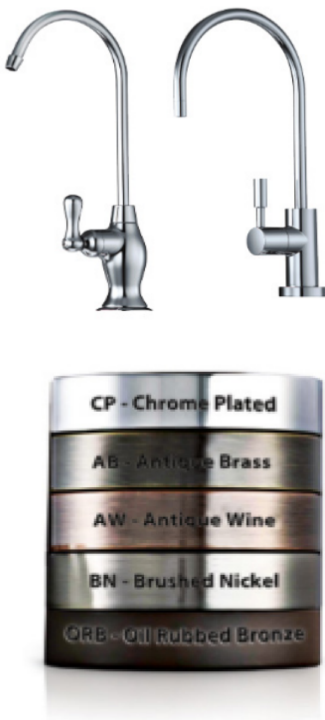

*Optional Alkaline In-line Filter

PRO GUARD QCRO SERIES

Keep your drinking water clean and safe with our ProGuard QCRO series system. It reduces the levels of lead, nitrates, cysts, arsenic, sodium and other contaminants that can be found in unfiltered tapwater. This easy to install system offers quality water 24 hrs a day, 365 days a year

WHY REMOVE CHLORINE?

- ✓ Supply filtered water to a refrigerator water dispenser with a branch tee fitting (sold separately)
- ✓ Avoid having to boil water during boil alerts
- ✓ Add an in-line alkaline filter to raise the pH level of filtered water
- ✓ Quick-connect in/out connection points
- ✓ Eliminate up to 99% of dissolved solids, chlorine, fluoride, microorganisms and heavy metals such as barium, cadmium, chromium and lead
