

PRO SOFT UPFLOW SOFTENER SERIES

HIGH EFFICIENCY, LIFETIME CERAMIC TECHNOLOGY

- ✓ Upflow regeneration reduces salt usage by as much as 75% compared to downflow systems
- ✓ 1.25" tank riser pipe for high flow rate
- ✓ Premium cation resin media
- ✓ Intelligent metered electronic valve
- ✓ Patented ceramic internal valve components
- ✓ Multiple tank sizes available
- ✓ 1" ceramic hard water bypass valve
- ✓ IAPMO R&T and NSF certified
- ✓ Lifetime warranty on valves and tanks

Hard water (calcium & magnesium) is a common problem for many homeowners and businesses. When hardness minerals are combine with heat it forms troublesome scale. Scale causes costly build-up in piping, water heaters and other water appliances. When combined with soap, the minerals form soap curd or scum that cause dry hair & skin, faded laundry and build-up on fixtures.

SOFT WATER SAVES YOU MONEY

- Natural gas and electric water heaters cost up to \$100/year more to operate with hard water
- Soft water decreases soap and cleaning product use by 50 percent, saving as much as \$90/year
- Damaged clothing and fabric due to poor laundering with hard water can cost as much as \$200/year
- Damage to plumbing and appliances can cost as much as \$90/year

Data provided by the Water Quality Research Foundation

SPECIFICATIONS	PSUF10	PSUF15	PSUF20
Peak Flow Rate (at 15 psi drop)	16.0 GPM	18.0 GPM	20.0 GPM
Resin Media Volume (Cubic Feet)	1.0ft ³	1.5ft ³	2ft ³
Filter Tank Size <i>(additional sizes available)</i>	9x48	10x54	12x52
Valve Inlet / Outlet: 1" / 1"	Tank Riser Tube: 1.25"		
Drain / Brine: 3/4" / 3/8"	Hard Water Bypass		
Working Water Pressure: 20-120 psi	Working Water Temperature: 35 - 125 deg F
