Sip Your Way to Wellness.

ALKA PLATINUM REMOVES:

- Selenium
- Arsenic
- Cysts
- Barium
- Chromium
- Viruses
- Bacteria
- TDS
- Copper
- Lead
- Fluoride
- Cadmium
- Radium 226/228
- Pharmaceuticals

...and many more!

WHAT IS ALKA PLATINUM?

When water passes through 50 GPD reverse osmosis system, it breaks up the clusters of water molecules into smaller clusters. This makes it easier for your body to absorb, so you can stay **better hydrated**.

In the body, oxidation is chemical reaction involving oxygen molecules (or atoms) and various other substances, which results in the loss of an electron. Enter the antioxidant! An antioxidant has extra electrons that can be donated without itself becoming unstable. These superheroes search the body for free radicals and donate the lost electron, thus creating a stable, harmless molecule.

Keep your family healthy by drinking 9.5+ PH alkaline water from the Alka Platinum!

WHY ALKALINE WATER?

Alkaline water has a naturally high **pH level (8.0-10)** but the average diet consists of foods that are highly acidic (3.3-5.0). What most people do not know is this overload of acidic foods has been linked to many chronic conditions including diabetes and high blood pressure.

By consuming alkaline water in place of tap water, you can **help your body find the natural balance it seeks!**
